"Mr. Piel's selection of film of Lisa Thomas, Julia Macdonald, Eugenia Piretti and Christy Turlington, convey an almost tactile intimacy as different from the hyperglamorous mood so prevalent today as a direct-sequipped apple is from one set to the next."

The new photographs collected here are a mosaic, but it that mosaic, you glimpse into an artist's world

Denis Piel, a photographer and artist (and a friend), knows that better than anyone. Denis does more than take a photo - he tells you a story. He's a visual artist. His "MOMENTS" book is a mosaic of his work, and it's a mosaic of his life. It's a mosaic of his art, his life, and his love for photography. It's a mosaic of his art, his life, and his love for photography. It's a mosaic of his art, his life, and his love for photography.
